Volume 15

1974

Japanese Society of Plant Physiologists
Kyoto, Japan

The publication of this journal has been supported in part by financial aid from the Ministry of Education.

CONTENTS

No. 1, February, 1974

Hasegawa, K. and T. Hashimoto: Gibberellin-induced dormancy and batatasin content in yam bulbils 1

Syōno, K. and T. Furuya: Induction of auxin-nonrequiring tobacco calluses and its reversal by treatments with auxins 7

Cutler, H. G. and R. J. Cole: Properties of a plant growth inhibitor extracted from immature tobacco leaves 19

Lau, O. L. and K. H. Yung: Synergistic effect of kinetin on IAA-induced ethylene production 29

Nakamura, Y. and M. Yamada: Long chain fatty acid synthesis in developing castor bean seeds I. The operation of the path from acetate to long chain fatty acids in a subcellular particulate system 37

Yamada, M., Q. Usami and K. Nakajima: Long chain fatty acid synthesis in developing castor bean seeds II. Operation of the path from sucrose to long chain fatty acids in a subcellular particulate system 49

Fortino, J. and W. E. Splittstoesser: Lycopene induction in *Cucurbita moschata* cotyledons by CPTA 59

Oota, Y.: Removal of the sugar inhibition of flowering in *Lemna gibba* G3 by catecholamines 63

Yamashita, T. and G. Tomita: Effects of manganese, calcium, dithiothreitol and bovine serum albumin on the light reactivation of Tris-acetone-washed chloroplasts 69

Takeba, G.: Activation of phosphate metabolism in cotyledons of *Pharbitis nil* in the early stage of germination as studied by multicompartmental analysis 83

Okayama, S.: Functional sites of plastoquinone in photosynthetic electron transport system 95

Tazawa, M., U. Kishimoto and M. Kikuyama: Potassium, sodium and chloride in the protoplasm of Characeae 103

Sawada, S. and S. Miyachi: Effects of growth temperature on photosynthetic carbon metabolism in green plants I. Photosynthetic activities of various plants acclimatized to varied temperatures 111

Iwami, S. and Y. Masuda: Geotropic response of cucumber hypocotyls 121

Ohmori, M. and A. Hattori: Effect of ammonia on nitrogen fixation by the blue-green alga *Anabaena cylindrica* 131

Short communications

Suge, H.: Synergistic action of ethylene with helminthosporic acid in the growth of rice seedlings 143

Tanaka, K., T. Yoshida and Z. Kasai: Radioautographic demonstration of the accumulation site of phytic acid in rice and wheat grains 147
Frith, G. J. T.: Light stimulated activity of nitrate reductase in apple roots 153
Sacher, J. A. and D. D. Davies: Demonstration of de novo synthesis of RNase in *Rhoeo* leaf sections by deuterium oxide lebeling 157
Mukohata, Y., T. Yagi, A. Matsuno, M. Higashida and Y. Sugiyama: Choline, tetraalkylammonium and aminoalcohol as preservers of photosynthetic activities in isolated chloroplasts 163
Eldan, M., A. M. Mayer, A. Poljakoff-Mayber and M. Eldan: Difference in subcellular localization of isocitrate lyase in lettuce seeds of different ages 169
Oku, T., K. Sugahara and G. Tomita: Functional development of photosystems I and II in dark-grown pine seedlings 175
Oguni, I. and I. Uritani: Effect of (−)-hydroxycitrate on ipomeamarone biosynthesis from pyruvate in sweet potato with black rot 179
Morimoto, N. and Y. Oda: Photo-induced karyogamy in a basidiomycete, *Coprinus macrorhizus* 183
Imamura, M. and S. Shimizu: Metabolism of chlorophyll in higher plants IV. Relationship between fatty acid oxidation and chlorophyll bleaching in plant extracts 187
Shibata, K., T. Kubota and S. Kamisaka: Isolation and chemical identification of a lettuce cotyledon factor, a synergist of the gibberellin action in inducing lettuce hypocotyl elongation 191

No. 2, April, 1974

Inoue, Y. and M. Furuya: Perithecial formation in *Gelasinospora reticulispora* II. Promotive effects of near-ultraviolet and blue light after dark incubation 195
Tazaki, K., T. Minamikawa and S. Yoshida: Alicyclic acid metabolism in plants V. Biosynthesis of alicyclic acids from ^{14}C-labeled glucose and erythrose in some plant tissues 205
Mohanty, P., Govindjee and T. Wydrzynski: Salt-induced alterations of the fluorescence yield and of emission spectra in *Chlorella pyrenoidosa* 213
Sawada, S. and S. Miyachi: Effects of growth temperature on photosynthetic carbon metabolism in green plants II. Photosynthetic $^{14}CO_2$-incorporation in plants acclimatized to varied temperatures 225
Sawada, S., H. Matsushima and S. Miyachi: Effects of growth temperature on photosynthetic crabon metabolism in green plants III. Differences in structure, photosynthetic activities and activities of ribulose diphosphate carboxylase and glycolate oxidase in leaves of wheat grown under varied temperatures 239
Newton, R. J.: Dual pattern of DL-leucine absorption by duckweed root tips 249

Shibaoka, H.: Involvement of wall microtubules in gibberellin promotion and kinetin inhibition of stem elongation 255
Hogetsu, T., H. Shibaoka and M. Shimokoriyama: Involvement of cellulose synthesis in actions of gibberellin and kinetin on cell expansion. Gibberellin-coumarin and kinetin-coumarin interactions on stem elongation ...265
Colclasure, G. C. and W. E. Schmid: Absorption of cobalt by excised barley roots 273
Giles, K. L.: Complementation by protoplast fusion using mutant strains of maize 281
Ishiguri, Y. and Y. Oda: Flowering of the long-day plant, *Lemna gibba*, under short-day schedules composed of red and far-red light 287
Kuraishi, S.: Biogenesis of auxin in the coleoptile of a semi-brachytic barley, uzu 295
Kazama, H. and M. Katsumi: Auxin-gibberellin relationships in their effects on hypocotyl elongation of light-grown cucumber seedlings II. Effect of GA_3-pretreatment on IAA-induced elongation 307
Katsumi, M. and H. Kazama: Auxin-gibberellin relationships in their effects on hypocotyl elongation of light-grown cucumber seedlings III. Gibberellin specificity in its enhancing effect on IAA-induced elongation ...315
Yasuda, T., Y. Yajima and Y. Yamada: Induction of DNA synthesis and callus formation from tuber tissue of Jerusalem artichoke by 2,4-dichlorophenoxyacetic acid 321
Nakano, M. and T. Asahi: Isolation of membranes containing protease from the cotyledons of germinating pea seeds 331
Zieslin, N., I. Biran and A. H. Halevy: The effect of growth regulators on the growth and pigmentation of "Baccara" rose flowers 341
Basler, E.: Abscisic acid and gibberellic acid as factors in the translocation of auxin 351
Kato, Y.: Bud formation on excised *Heloniopsis* leaf fragments: Effects of leaf age and the midrib 363
Singh, S. and S. G. Wildman: Kinetics of cold inactivation and heat reactivation of the ribulose diphosphate carboxylase activity of crystalline Fraction I proteins isolated from different species and hybrids of *Nicotiana* ...373

Short communications

Wada, K.: Floral initiation under continuous light in *Pharbitis nil*, a typical short-day plant 381
Yamaki, S. and I. Uritani: Mechanism of chilling injury in sweet potato XI. Irreversibility of physiological deterioration 385
Hogetsu, T., H. Shibaoka and M. Shimokoriyama: Involvement of cellulose synthesis in actions of gibberellin and kinetin on cell expansion. 2,6-Dichlorobenzonitrile as a new cellulose-synthesis inhibitor 389
Loh, J. W. C.: The stimulation of indoleacetic acid synthesis in bush bean plants (*Phaseolus vulgaris* L.) by naphthenates 395
Gepstain, S. and I. Ilan: Does osmotic regulation of amylase synthesis in barley endosperm exist? 399

No. 3, June, 1974

Oota, Y. and T. Kondo: Removal by cyclic AMP of the inhibition of duckweed flowering due to ammonium and water-treatment 403
Watanabe, M. and M. Furuya: Action spectrum of phototaxis in a cryptomonad alga, *Cryptomonas* sp. 413
Brunori, A., Y. Hotta and H. Stern: Instability of thymidine kinase in plant extracts 421
Hosoi, K.: Purification and some properties of L-tyrosine carboxy-lyase from barley roots 429
Yoshida, K.: RNA containing poly-A sequence in *Pharbitis nil* cotyledons and its template activity in vitro 441
Nakagawa, S., H. Kataoka and M. Tazawa: Osmotic and ionic regulation in *Nitella* 457
Inoue, Y. and M. Furuya: Perithecial formation in *Gelasinospora reticulispora* III. Inhibitory effects of near-UV and blue light during the inductive dark period 469
Nomura, T. and T. Akazawa: Enzymic mechanism of starch breakdown in germinating rice seeds V. Sucrose phosphate synthetase in the scutellum 477
Goldschmidt, E. E. and D. Galily: The fate of endogenous gibberellins and applied radioactive gibberellin A_3 during natural and ethylene-induced senescence in citrus peel 485
Rothe, G. M.: Aldehyde oxidase isoenzymes (E.C.1.2.3.1.) in potato tubers (*Solanum tuberosum*) 493
Gertman, E. and Y. Fuchs: Changes in pectinmethylesterase (PME) activity caused by ethylene applied at different temperatures 501
Kasamo, K. and T. Yamaki: Mg^{++}-activated and -inhibited ATPases from mung bean hypocotyls 507
Usuda, H., H. Matsushima and S. Miyachi: Assimilation of carbon dioxide in mesophyll chloroplasts and bundle sheath strands mechanically isolated from corn leaves 517
Safran, E. M. and A. G. Galsky: The action of cyclic AMP on GA_3 controlled responses VI. Characteristics of the promotion of light-inhibited seed germination in *Phacelia tanacetifolia* by GA_3 and cyclic 3′,5′-adenosine monophosphate 527
Stemler, A. and Govindjee: Bicarbonate stimulation of oxygen evolution, ferricyanide reduction and photoinactivation using isolated chloroplasts ...533
Hara, F. and T. Akazawa: Glycogen biosynthesis in *Chromatium* strain D II. Purification and properties of glycogen synthetase 545

Short communications

Matsuo, T. and T. Mizuno: Changes in the amounts of two kinds of reserve glucose-containing polysaccharides during germination of the Easter lily bulb 555
Shiomi, N. and S. Hori: Pattern of glucose-^{14}C catabolism in barley seedlings during vernalization 559

Barash, I., T. Sadon and H. Mor: Relationship of glutamate dehydrogenase levels to free amino acids, amides and ammonia in excised oat leaves 563
Aono, R., H. Kano and H. Hirata: Photosynthetic activity of isolated spinach mesophyll cells 567
Asami, S. and T. Akazawa: Oxidative formation of glycolic acid in photosynthesizing cells of *Chromatium* 571
Davis, G. J., M. N. Jones, C. Z. Lunney and G. M. Clark: Inhibition of sodium chloride toxicity in seedlings of *Myriophyllum spicatum* L. with calcium 577
Sivalingam, P. M., T. Ikawa and K. Nisizawa: Possible physiological roles of a substance showing characteristic UV-absorbing patterns in some marine algae 583

No. 4, August, 1974

Wakamatsu, K. and M. Nishimura: Energy conversion and changes in physical parameters in chloroplasts and subchloroplast particles I. Ion transport, ionic environment and the light-induced 475–515 nm absorbance change 587
Wakamatsu, K., N. Ikehara and M. Nishimura: Energy conversion and changes in physical parameters in chloroplasts and subchloroplast particles II. Energy conversion in chloroplasts and different types of subchloroplast particles 601
Sakano, K., S. D. Kung and S. G. Wildman: Change in the solubility of crystalline Fraction I proteins correlated with change in the composition of the small subunit 611
Mukohata, Y., T. Yagi, M. Higashida, A. Matsuno and Y. Sugiyama: Comparative studies on the properties of spinach chloroplasts prepared by media containing choline chloride or sucrose 619
Fuchs, Y. and E. Gertman: Insoluble antibody column for isolation and quantitative determination of gibberellins 629
Rudich, J. and A. H. Halevy: Involvement of abscisic acid in the regulation of sex expression in the cucumber 635
Hayes, R. G. and W. H. Klein: Spectral quality influence of light during development of *Arabidopsis thaliana* plants in regulating seed germination ...643
Yoneyama, T. and K. Kumazawa: A kinetic study of the assimilation of ^{15}N-labelled ammonium in rice seedling roots 655
Pjon, C.-J. and M. Furuya: Phytochrome action in *Oryza sativa* L. VII. Effects of light and aeration on coleoptile growth under submerged conditions 663
Yamaki, S. and I. Uritani: Mechanism of chilling injury in sweet potato Part XII. Temperature dependency of succinoxidase activity and lipid-protein interaction in mitochondria from healthy or chilling-stored tissue 669
Rena, A. B. and W. E. Splittstoesser: The metabolism of proline in cotyledons of pumpkin (*Cucurbita moschata*) 681

Jablanović, M. and L. D. Noodén: Changes in competible IAA binding in relation to bud development in pea seedlings 687
Kadman-Zahavi, A. and E. Ephrat: Opposite response groups of short-day plants to the spectral composition of the main light period and to end-of-day red or far-red irradiations 693
Fuchs, Y. and E. Gertman: Studies of the effects of ethylene on yeast alcohol dehydrogenase activity 701
Sakurai, N., K. Shibata and S. Kamisaka: Stimulation of cucumber hypocotyl elongation by dihydroconiferyl alcohol. Interactions between dihydroconiferyl alcohol and auxin or gibberellin 709

Short communications

Inoue, Y. and K. Shibata: Comparative examination of terrestrial plant leaves in terms of light-induced absorption changes due to chloroplast rearrangements 717
Sugiyama, T.: Proteinaceous factor reactivating an inactive form of pyruvate Pi dikinase isolated from dark-treated maize leaves 723
Satoh, K., A. Takamiya and S. Katoh: Effect of salts on the Hill reaction in sonicated spinach chloroplasts 727
Kojima, M. and I. Uritani: The possible involvement of a spore agglutinating factor(s) in various plants in establishing host specificity by various strains of black rot fungus, *Ceratocystis fimbriata* 733

No. 5, October, 1974

Dijkmans, H. et J. Aghion: Conditions de formation d'agrégats de chlorophylle a dans des solvants polaires aqueux: Polarité du milieu 739
Muhammad, S. and K. Kumazawa: Assimilation and transport of nitrogen in rice I. ^{15}N-labelled ammonium nitrogen 747
Muhammad, S. and K. Kumazawa: Assimilation and transport of nitrogen in rice II. ^{15}N-labelled nitrate nitrogen 759
Shimoda, C. and N. Yanagishima: Mating reaction in *Saccharomyces cerevisiae* VI. Effect of 2-deoxyglucose on conjugation 767
Fujita, Y., C.-J. Pjon and R. Suzuki: Studies on the Hill reaction of membrane fragments of blue-green algae V. A correlation between the solubilization of a photochemically active chromoprotein (ACP) and the inactivation of photosystem II activity in membrane fragments of *Anabaena cylindrica* 779
Pjon, C.-J. and Y. Fujita: The separation and characterization of the photoreactive component of a photochemically active chromoprotein (ACP) obtained from the blue-green alga *Anabaena cylindrica* 789
Nakayama, K., M. Okada and A. Takamiya: A new light-induced absorbance change at 561 nm in chloroplasts of green alga, *Bryopsis maxima* ...799
Posner, H. B., J. Gressel and A. Rosner: Direct evidence for the lack of methylation of two pulse labeled plant RNAs 807

Halevy, A. H., S. Mayak, T. Tirosh, H. Spiegelstein and A. M. Kofranek: Opposing effects of abscisic acid on senescence of rose flowers 813
Yamamoto, R., K. Maki, Y. Yamagata and Y. Masuda: Auxin and hydrogen ion actions on light-grown pea epicotyl segments I. Tissue specificity of auxin and hydrogen ion actions 823
Yamagata, Y., R. Yamamoto and Y. Masuda: Auxin and hydrogen ion actions on light-grown pea epicotyl segments II. Effect of hydrogen ions on extension of the isolated epidermis 833
Tanaka, Y., M. Kojima and I. Uritani: Properties, development and cellular-localization of cinnamic acid 4-hydroxylase in cut-injured sweet potato 843
Mukherjee, I.: Photoperiodic sensitivity of the cotyledon and first true leaf of *Xanthium* 855
Fujita, Y.: The light-induced oxidation-reduction reaction of cytochrome b-559 in membrane fragments of the blue-green alga *Anabaena variabilis* 861
Gregor, D., J. Reinert and H. Matsumoto: Changes in chromosomal proteins from embryo induced carrot cells 875
Funkhouser, E. A. and C. A. Price: Chloroplast RNA: Possible site of an early lesion in iron deficiency 883
Rosner, A., D. Porath and J. Gressel: The distribution of plastid ribosomes and the integrity of plastid ribosomal RNA during the greening and maturation of *Spirodela fronds* 891
Horikoshi, T., Y. Kitamoto and Z. Kasai: Effect of light on the initiation of pileus formation in a basidiomycete, *Favolus arcularius* 903
Ogawa, T., Y. Inoue and K. Shibata: Chlorophyll *a* forms in mesophyll and bundle sheath chloroplasts of *Zea mays* leaves grown at low light intensity 913
Matsuka, M. and S. Miyachi: Photosynthetic metabolism of $^{14}CO_2$ in the process of the "glucose-bleaching" of *Chlorella protothecoides* 919
Kamiya, A. and S. Miyachi: Effects of blue light on respiration and carbon dioxide fixation in colorless *Chlorella* mutant cells 927

Short communications

Fujita, Y. and S. Shimura: Phycoerythrin of the marine blue-green alga *Trichodesmium thiebautii* 939
Ikehara, N.: Anion-dependent changes of energy transfer in chloroplasts III. Evidence for inactivation of light-triggered adenosine triphosphatase in chloroplasts by chloride 943
Smith, B. N. and C. R. Benedict: Carbon isotopic ratios of chemical constituents of *Panicum maximum* L. 949
Chin, C. K. and G. D. Weston: Glucosidase activity of excised roots of *Lycopersicon esculentum* 953

No. 6, December, 1974

Takeda, J. and M. Senda: Effect of light on sodium and chloride influxes in partly illuminated *Nitella flexilis* cells 957
Kasamo, K. and T. Yamaki: Effect of auxin on Mg^{++}-activated and -inhibited ATPases from mung bean hypocotyls 965
Takahama, U., H. Inoué and M. Nishimura: Oxidation-reduction reactions between electron transfer components and hydrogen perodixe in photosystem II of chloroplasts 971
Takahama, U., H. Inoué and M. Nishimura: Effect of hydrogen peroxide on the fluorescence and the C550 absorption change of spinach chloroplast fragments 979
Yamamoto, E., T. Sugiyama and S. Miyachi: Action spectrum for light activation on pyruvate, phosphate dikinase in maize leaves 987
Chen, T. C. and G. W. Miller: Purification and characterization of uroporphyrinogen decarboxylase from tobacco leaves 993
Saito, K. and M. Senda: The electrogenic ion pump revealed by the external pH effect on the membrane potential of *Nitella*. Influences of external ions and electric current on the pH effect 1007
Kobayashi, M.: Control of cell division in a green alga, *Ankistrodesmus gracilis* 1017
Yamamoto, R., K. Maki and Y. Masuda: Auxin and hydrogen ions on light-grown pea epicotyl segments III. Effect of auxin and hydrogen ions on stress-relaxation properties 1027
Ohkawa, T. and U. Kishimoto: The electromotive force of the *Chara* membrane during the hyperpolarizing response 1039
Vigue, J., P. H. Li and C. R. Oslund: The effect of low temperature upon the polyribosome, nucleic acid and protein content of potato leaves 1055
Oota, Y. and T. Hoshino: Diurnal change in temperature sensitivity of *Lemna gibba* G3 induced by acetylcholine in continuous light 1063
Yamamoto, R., H. Kawamura and Y. Masuda: Stress relaxation properties of the cell wall of growing intact plants 1073
Masuda, Y., R. Yamamoto, H. Kawamura and Y. Yamagata: Stress relaxation properties of the cell wall of tissue segments under different growth conditions 1083
Kim, W. K. and I. Uritani: Fungal extracts that induce photoalexins in sweet potato roots 1093
Huzisige, H. and N. Takimoto: Analysis of photosystem II using particle II preparation III. Roles of cytochrome b_{559} with different redox potentials and plastocyanin in the photosynthetic electron transport system 1099
Miyoshi, Y., M. Furuya and A. Takimoto: Dark transformations of phytochrome in cotyledons of *Pharbitis nil* 1115

Short communications

Pieterse, A. H.: Gibberellin-EDDHA interaction in flowering and gibbosity of *Lemna gibba* G3 1125
Ohmori, M. and M. Yamada: Composition of phosphoglycerides and glycosyl glycerides in castor bean mitochondria 1129
Bovey, F., T. Ogawa and K. Shibata: Photoconvertible and non-photoconvertible forms of protochlorophyll(ide) in etiolated bean leaves 1133
Morikawa, H. and M. Senda: Oriented structure of matrix polysaccharides in and extension growth of *Nitella* cell wall 1139
Yamamoto, N., S. Sasaki, S. Asakawa and M. Hasegawa: Polysome formation induced by light in *Pinus thungergii* seed embryos 1143
